LED technology
powered by Nichia® & Cree®
Sleek, contemporary architectural lighting collection with high-performance LED technology powered by Nichia® and Cree®.

The modern, minimalist design of the LA210 collection is a striking complement for streetscapes, pedestrian areas and parks, commercial developments, and multifamily communities. Four sturdy struts connect to a large, heavy-duty spun aluminum hood and solid cast base for a low profile and long life.

Available in three sizes, the LA210 collection offers energy-efficient, high-performance lighting with multiple LED offerings:

- 24w/37w low-cost Cree modules; L70 50,000 hours | Type V only
- 46w/78w/117w high-performance LED platforms powered by Nichia; L70 60,000 | 115 to 125 lumens per watt | Type II, III or V distribution.

Fully compatible with wireless control systems, the LA210 collection also offers optional dimming to 10%. Additionally, all LED platforms have a U0 BUG rating (full cut-off).
# 210 Series

Post and wall mount available in three sizes

MLO & BUG Rating Guide

The Model Lighting Ordinance (MLO) is a guide for environmentally responsible outdoor lighting in North America and is the result of extensive efforts by the International Dark Sky Association (IDA) and the Illuminating Engineering Society of North America (IESNA).

Since 1985, ANP Lighting has been skillfully integrating design aesthetics, engineering excellence, and advancing technology to manufacture the industry’s only all-LED line of decorative architectural lighting and warehouse-inspired RLM fixtures. With our privately owned foundry and spinning facilities and in-house engineering department, we can quickly and cost-effectively modify any product to deliver an affordable custom solution. We empower architects, engineers, and specifiers to meet the growing demand for energy conservation, sustainability, and environmental design inspiration.

We design and manufacture the largest selection of LED decorative architectural lighting available today, including luminaires, bases, poles, and bollards, and are recognized as the #1 manufacturer of RLM fixtures and mountings in the industry.
